EDUCATION

Indian Institute Of Technology

Bachelor of Science, Data Science

Madras, India

Jan. 2022 – Jan 2026

Sri Eshwar College Of Engineering

B.TECH, AI and Data Science

Coimbatore, India

Nov. 2022 – Nov 2026

EXPERIENCE

Associate Engineer Intern

Present

Presidio

- Working on cloud and AI technologies, contributing to real-world enterprise solutions and scalable system design.

AI Engineer

Sep 2025 – Oct 2025

ZUDU.AI

Onsite - Chennai

- Fine-tuned a Tanglish-based LLM using Unsloth, leveraging GCP VMs for efficient model training. Conducted performance comparisons across multiple models, including Mistral, Gemma, and Qwen, to optimize accuracy and language understanding.

ML Engineer

May 2024 – Aug 2024

Cellstrat

Remote

- An AI-powered chatbot using VectorDB, OpenAI, and AWS, leveraging RAG to improve knowledge retrieval. Implemented effective prompt engineering techniques to enhance LLM-generated outputs. Designed and optimized RESTful APIs to integrate AI models into real-world applications.

150+ Hackathons Experience

Jan 2023 – Present

10X Hackathon Winner

- Participated in 70+ hackathons, winning Rs 6,08,000 through innovation and teamwork, including top positions in two international and two national-level competitions.

PROJECTS

Sketch Mentor | Gemini, Pydantic, Qwen, FastAPI, Langchain, VectorDB, OpenCV, React, MongoDB Mar 2025

- An AI-driven tool to solve handwritten mathematical expressions using LLMs (Gemini, Qwen), integrating RAG for improved knowledge retrieval and optimized prompt engineering. Built a scalable backend with LangChain and FastAPI for efficient LLM interactions.

Pulse AI | Python, Flask, OpenCV, MediaPipe, ReactJs, MongoDB Nov 2024

- Developed non-invasive heart rate tracking, temperature monitoring, and sleep analytics for newborns, along with automated APGAR scoring, improving NICU data accuracy by 50%.

Visionary Glucometer | OpenAI, Deep Learning, Tensorflow, MongoDB, OpenCV, React Native Aug 2024

- The Visionary Glucometer using CNN to estimate glucose levels from the iris and created a personalized food recommendation engine, improving dietary adherence by 40% over six months.

InnovHunt | Gemini, Langchain, Pinecone, Subabase, Flask, Web3, ReactJs, MongoDB July 2024

- The Combination Of Web3 And AI. It Connects the Investors and Founders. It contains Secure Transactions and AI Recommendation System Based on The Genre of the Investor

Prescription Analyze And Medicine Suggestion Bot | Gemini, Langchain, OCR, NER, Streamlit Mar 2024

- It is an OCR model to scan doctor's prescriptions and extract medicine names using NER. Integrated with a trained model, Provides descriptions and images of the medicines, functioning as a Prescription Analysis and Medicine Suggestion Bot.

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, SQL, JavaScript, HTML/CSS, R, Dart

Frameworks & Libraries: React, Flask, FastAPI, LangChain , n8n , Microsoft Power Automate , Low-code / No-code workflows

Core CS Concepts: Linux , Data Structures & Algorithms, Object-Oriented Programming (OOP), Scalable Systems, Distributed Systems (Basic), Performance Optimization

Databases: MySQL, MongoDB, Firebase, Supabase

Developer Tools: Putty, WinSCP Postman, Git, GitHub, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Cloud Technologies: AWS (Lambda, DynamoDB, EC2, WebSocket), Azure (ML Toolkit)
